Multi-Media Manager with a Built-In DVD/CD Optical Drive Storage / Reader /Writer

Experience new way to manage your 100 favorite DVD/CDs

PowerDrive is a 2-in-1 device with an Automatic Disc Library (Storage/Retrieval) and an external DVD Writer. It allows you to access your CD Library and the built-in optical drive simultaneously.

As a storage device, it provides an enormous capacity (100 DVD per unit or 12,700 DVD per system via USB hubs), imagine what you can do with a maximum of 600 trillion bytes of online storage space when it's filled up with re-writable DVD discs. Searching for any CD/DVD titles or audio/music/video can never be any easier, all it takes is a PC command.

The disc is automatically loaded into the optical drive in seconds and is readily available for your applications.

A digital library is created at the first time you insert a CD into the system, or it's expanded whenever you add a new disc into the system, using the CD Library 5.0 software that comes with it.

With PowerDrive, it makes your digital life simple and productive.

Specification

Product Name: PowerDrive

Model Number: DC-016RW

Capacity: 100 CD/DVD of 12cm size

Dimension: 370mm X 430mm X 186mm

Port: USB 2.0 (B Type port)

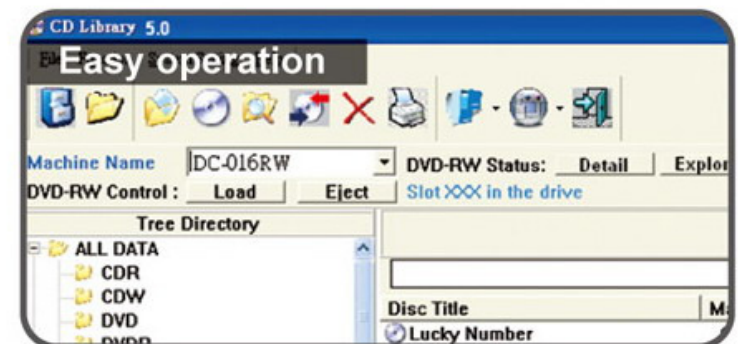

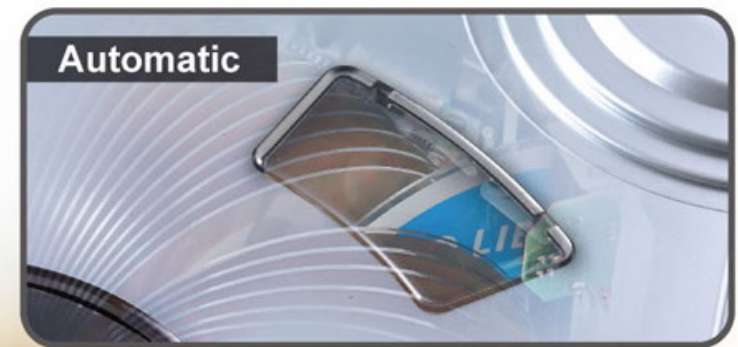

Power: Input 100~240V, Output 7.5V 2.5A

Drive: Maximum 8X (10.56 Mbytes/sec, DVD) / 24X (3,600 Kbytes/sec, CD) Data Transfer Rate

8X DVD / 24X CD / 8X DVD+R Disc Writing Speed / 8X DVD+RW Disc Writing Speed / 6X DVD+R DL Disc

Writing Speed / 8X DVD-R Disc Writing Speed / 6X DVD-RW Disc Writing Speed / 6X DVDR

DL Disc Writing Speed / 5X DVD-RAM Writing Speed
