- 5760 x 1400 maximum dpi resolution

### THE INDUSTRY'S MOST COST-EFFECTIVE MEDIA PRINT SOLUTION

Microtech Systems, the leading developer and manufacturer of automated disc duplication/publishing systems and media printing technology, has launched a new "automation ready" disc printer, the Xstreamjet.

The Xstreamjet Printer brings professional quality to in-house production of discs, enabling users to print outstanding photo quality images directly onto the surface of discs. A cost-effective

stand-alone or integrated media printing solution, the Xstreamjet leverages new advances in inkjet technology to provide the highest resolution production in the industry's lowest print cost-per-disc solution.

Ink options include six separate cartridges for the most efficient use of ink or the bulk ink refill option, providing a continuous ink supply for up to 2500 full-coverage disc prints before replenishment is required. Up to 28,000 disc prints is possible with the addition of a bulk ink kit, enabling an industry-leading print cost of just \$.03 per disc.

Paired with Microtech's Xpress Family of automated disc duplicators, the Xstreamjet provides fast, professional quality and unattended printing of discs 24/7.

### DISCPRINT SOFTWARE

Microtech's own premium DiscPrint software is the tool used for designing and printing images and text directly onto media, for a completely professional presentation. Our software allows you to generate dynamic text, supporting text and graphic files, enabling your creativity to be the guide. Most popular graphics software programs can also be used.

### INK CARTRIDGES

For your convenience, Microtech provides Media Solutions to keep your jobs running around the clock. Please contact our sales team for more information.
