# EPSON DISCPRODUCER PP-50

---

Burn and print high-quality CDs and DVDs the easy and economical way. The Epson Discproducer PP-50 is fully automated, leaving you free to get on with other tasks while it reliably publishes up to 50 discs in one batch. It's perfect for distributing information, archiving files and backing-up data.

Offering an ideal combination of quality and economy, the Discproducer PP-50 delivers accurate burning and photo-realistic printing with a low cost per unit.

Thanks to Epson's individual inks system, the cost of each produced media is low as you only need to replace the colour used and, depending on the print image, you can produce over 1,000 fully covered discs from one set of cartridges. The Discproducer PP-50 automatically stops printing until it's replaced to avoid mis-prints.

For disc publishing you can rely on, Epson has drawn on its expertise in manufacturing robots to develop the patented AcuGrip robotic arm, which ensures that only one CD/DVD is grabbed at a time – even if they're stuck together. This allows you to leave production runs unsupervised with less risk of failure. To ensure trouble-free operation for years to come, the Discproducer PP-50 has a dust-proof body and a minimum of moving parts.

The included software is user-friendly too, with pre-defined templates and images, so you don't need to be an expert to use it.

One of the smallest disc publishing solutions on the market, the fully-stackable Discproducer PP-50 has a compact footprint and measures only 38cm wide to fit easily onto a shelf or desktop.

The Epson Micro Piezo printhead and 6-colour inks produce ultra-fine colour gradations and razor-sharp text
